HOW TO CHOOSE A TENNIS RACKET

Each of the manufactures has a different method of categorising rackets. We have simplified the whole process for you. We have given each racket a power level based on: 1. The speed of the ball off the racket- we have tested all the rackets. 2. The head size- the bigger the racket head the more powerful the racket. 3. Thickness of beam- the thicker the beam, the more powerful the racket 4. Weight of racket- Light rackets (225g to 280) is generally more powerful. Medium rackets are generally (280g to 300g). Heavy rackets are generally (300g to 340g) these are control rackets.

So which type of racket should you go for?

CONTROL RACKET

Plenty of control and feed back from the racket.
 Would suit: Advanced players playing club team or tournament tennis Players with longer or full strokes. Players who have problems controlling the ball. Good adult sized juniors.

MID CONTROL/POWER

Nice mixture of power and control.
 Would Suit: Club or recreational players who hit the ball reasonably well. Advanced players who need more power. Adult sized junior.

POWER RACKET

Very user friendly. Easy to serve with, volley with. Very easy on your body.
 Would suit: Recreational players who have a short back swing.

Each Racket will have the following symbols to help you:
W - Unstrung weight in grams • **H** - Head size in square inches.
B - Beam width in millimetres • **P** - Tennis nuts power level

MORE SPIN. MORE CONTROL. MORE POWER. MORE COMFORT. 4 OUT OF 4 ISNT BAD.

The modern game has changed and is all about aggressive spin. Wilson's Steam 99s & Steam 105S tennis rackets use Spin Effect Technology (S.E.T.) to maximize "snapback." More snapback means more spin; more spin means more balls in play. The net seems lower and the court feels longer and in a game of inches, more spin can make all the difference.

POWER + SPIN

For players who want more power and the ability to generate additional spin.

RIP IT. ROLL IT. CURVE IT. KICK IT. HIT IT HEAVY. MAKE IT DIP. SPIN IT TO WIN IT. GET S.E.T.

MORE STRING MOVEMENT + FASTER SNAPBACK = MORE SPIN

Organix

Full integration of mind, body and racquet
Organix is high tech carbon nano tubes that surround CNT coated cellulose fibers to obtain elastic properties for more dynamic and power to your game. Due to the explosive springboard effect of the ORGANIX material, it will be loaded

up with kinetic energy during initial ball impact and will release it back immediately again due to extraordinary vibration absorbing properties. With the power of carbon nano tubes and the dampening of natural ORGANIX material, it is the most advanced material to date.

GT - Graphite - Tungsten Technology

Concentrated at 3 and 9 o'clock on the string bed, the combination of carbon and remarkably stiff Tungsten fibers makes the racquet twice as stable as standard carbon frames, for less torque and greater precision.

Cortex Active Technology: Intelligent vibrations filters

Every time a racquet hits a ball, it generates thousands of vibrations, hundreds of which cause discomfort, while others help players get a better feel for the ball. Since each player has different needs, Babolat has designed a system with three new types of dampeners to enable all types of players to find just the right amount and kinds of sensations to suit their specific style and preferences.

CORTEH

NEW Cortex Expert Pure sensations

A CDS (Cortex Dampening System) interface transmits useful information to the player and the new handle design brings that information closer to the player's hand for perfect control on every hit.

DIAGNOSTIC
Light weight rackets (under 300g) generate 43% less power and 18% more shocks

SOLUTION
OXSYNERGYLINK
A bi-composite PU (polyurethane) construction of the grommets to allow 18% more shock absorption to limit the vibration upon impact.

The racket also comes pre-strung with a top of the range multifilament Tecnifibre string. The unique patented PU400 technology results in a string with an elasticity property of 400%. This not only has a high shock absorption property but provides the light weight rackets with the much needed power.

Model	W	H	SP	String	RRP
Fight 255	255g	100in ²	16x19	TGV	£134.99
Fight 280	280g	100in ²	16x19	TGV	£139.99
Fight 295MP	295g	100in ²	16x19	XR1	£159.99

For the player looking for CONTROL who has medium to long rally durations

DIAGNOSTIC
Heavier rackets (300g+) are generally used by players of a good technical level, who tend to use polyester strings for added control, as the power already comes from the rackets weight and the good technique of the player. However, polyester strings cause high vibration through the handle, resulting in discomfort and fatigue.

SOLUTION
TOURPREPARED
Injection of silicon between the graphite fibres in the handle to reduce the bad vibrations linked to the use of polyester, providing a more comfortable racket with a more precise feel.

Tecnifibre's goal in product innovation is to propose the most efficient product for each specific player target. We must study and measure the real effects which are caused by the game of tennis and by the material upon the body whatever the player level. For this reason, Tecnifibre created the PLAYLAB, the first in-play lab: a laboratory which takes place on the tennis court. It aims to:

- Diagnose the problems faced by players when playing tennis, looking at different weights of rackets, strings, grips, etc.
- Propose useful technology to provide a solution to the diagnostic to improve the performance of the product and player, by analysing how different materials and technologies affect the play and the player during on court laboratory testing.

WARRIOR SERIES

Your best defense is a fierce offense. You don't tiptoe around on the court because your game is about one thing and one thing only: pure, raw, explosive power. Athletes who arm themselves with a Warrior Series racquet take their game right to their opponent by punishing the ball with screaming ground stroke winners, crisp volleys, and booming serves.

Bolleé's COMPETIVISION® lenses act like a filter to mute the colour spectrum except optic yellow, making the ball pop out of the background. The frames include rubber nose pads and temple tips to provide ultimate comfort and security during active use. Bolleé's competitivision lens is so effective, they are the official supplier of sunglasses to Tennis Coach UK.

3 STEPS TO CHOOSE YOUR STRING

1 WHAT IS MY PLAYER PROFILE AND MY FREQUENCY OF BREAKAGE?

PROFILE A: I'm looking for power and comfort and I rarely break my strings.
 PROFILE B: I'm looking for versatility and I occasionally break my strings.
 PROFILE C: I'm looking for durability and control and I frequently break my strings.

2 WHAT IS THE ADDITIONAL BENEFIT I'M LOOKING FOR?

POWER CONTROL DURABILITY COMFORT

PLAYER PROFILE ADDITIONAL BENEFIT GAUGE

130- GAUGE

DID YOU KNOW IT ?

THE GAUGE (I.E THE DIAMETER) AND THE TENSION AFFECTS THE BEHAVIOR OF STRINGS.

GAUGE
A thinner gauge for more power and feel. A thicker gauge for increased durability.

TENSION
Each string has its own recommended tension, which corresponds to a standard tension. By reducing the tension, the strings will provide more power and control. Increasing the tension will make the string bed stiffer, for greater control.

HYBRIDS

By selecting two different types of strings, one for the mains and another one for the crosses, Hybrid technology allows you to take advantage of the combined benefits of each string to create a winning combination for each player.

BABOLAT OFFERS YOU FIVE WINNING COMBINATIONS.

- PRO HURRICANE TOUR + VS
- PRO HURRICANE + N'VY
- PRO HURRICANE TOUR + XCEL - VS + SYNTHETIC GUT
- RPM BLAST + VS

- In our opinion, this this the best value for money machine, as equivalent machines from one of the major nrandns can cost up to £5,000! Specifications: Six-point, suspension mounting system
- True constant pull tensioning system
- Linear ball bearing string gripper with drum
- 10-90 pound (4.5-40.9 kilograms) tension range with 0.1 pound accuracy in both pound and kilogram scales
- 360 degree swivel turntable with ball bearing device
- Four slim diamond-coated, heavy-duty dual-action thumb-adjustable stainless steel swivel clamp (fixed clamps): 2 PN-1012 tennis clamps and 2 PN-1013 badminton and squash clamps
- Handle any diagonal stringing (fan patterned frames)

Features:

- Digital electronic stringing machine with keypad and LED digital display Microprocessor controlled, electronic pulling and monitoring device eliminates any tension loss during pulling process.
- Six-point, suspension mounting system provides 10-point maximum supports and eliminates any racquet distortion. Micro-adjustable head and throat mounting posts. 4 individually adjustable side-support arms (heavy-duty)
- Padded K-shaped side supports. Padded head and throat mounting posts secure any frame (including deep V-shaped throats), no cosmetic damage to any frame.
- All-metal Linear ball bearing string gripper with drum grips the string automatically. There is no string pull or muscle to use. Also no crimp or damage to any string. See operating procedures. Dual-action swivel clamps can move in any direction up and down; and can handle all types of racquets without extra accessories.
- All-metal spring-assisted swivel clamp base: much easier to use and no muscle needed. Just need one-eighth turn to lock and release the base. See operating procedures. 360 degree racquet rotation with ball bearing device
- 2 convenient tool trays: Top tool tray and front tool tray Convenient racquet holder. Machine base with level-adjustable pads. Tools: Allen wrenches - 6mm, 5mm, 3mm. Free stringing tools: 1 DP-507 diagonal cutter, 1 NP-500 needle nose pliers, 1 BS-809 tennis awl and 1 PN-3092 string mover
- User's manual Free illustrated stringing tutorial guide: show you how to string racquets step by step. String all racquets: tennis, oversized tennis, widebodies, longbodies, fan patterned, squash, racquetball, and badminton. Easy to convert to table-top stringing machine; just need to remove the stand.
- One hour training session with one of our stringers with every purchase of a stringing machine
